RCS IT A/S acquires Department of Vojens

Copenhagen and Vojens, 3 September 2018: RCS IT A/S acquires Sentia's Danish application development department in Vojens, adding to a portfolio of industry-specific software solutions.

Per 1 August 2018 Sentia's application development team of 4 employees as well as Vojens office location are a part of RCS IT with the imminent relocation to the main office of Haderslev. RCS IT founder and CEO, Robert Schytt states:

"The acquisition will strengthen RCS IT with a great set of competencies in application development and marketing. We will advance our organisation to better serve our customers on a higher scale with an elevated workforce."

The acquisition is a part of Sentia's strategy of consolidating and centralising main activities to focus on providing managed cloud services to the European enterprise market. Peter Michael Nielsen, Deputy Managing Director says:

"We are proud to hand over our team in Vojens to RCS IT, as we see them in a great fit for their current areas of work. With this acquisition, the personnel are able to maintain their jobs and continue on working with what they love - close to their families. We thank them for their time with us and wish them all the best in their future careers at RCS IT."

With RCS IT's ambition to grow and expand activities, the acquisition supports that ambition as well as the vision of establishing Denmark as the platform for a future international presence.

About RCS IT
RCS IT was founded in 2008 by Robert Z. Schytt and currently employs 12 application and development consultants from the main office of Haderslev. RCS IT offers tailored software solutions for small- and mid-sized companies and are experts in development and deployment of SAP solutions.

A close partnership with SAP Nordic testifies to the expertise of RCS IT A/S as a certified SAP and Microsoft partner.
