RCS IT

Intrastatmodule Plus

RCS IT offers the Intrastat Plus which builds upon SAP Business One standard intrastat module. RCS IT has extended the module with important additions.

Intrastat Plus simplifies processes and optimizes work procedures, so that your company can get the most out of SAP standard intrastate module. With the additions from RCS IT you will notice a strikingly difference and extension of the tools that are in the module.

In Intrastat Plus you can

» Localize the module for Denmark, so that you can use it for Danish statistics
» Export a file which Danish statistics can use directly
» Make a back-up of what you have send to Denmark's statistics
» Update codes for commodities automatically
» Optimize work procedures

3 Good Reasons

1. Intrastat Plus creates an automatic file format which Denmark's statistics can read.
2. With Intrastat Plus you can simplify business procedures by making intrastate data.
3. Intrastat Plus is flexible if you have special data that needs to be updated.
