Product Configurator

RCS Product Configurator 100% integrated with SAP Business One.
RCS Product Configurator is a solution, which gives your company the opportunity to support sales of an unlimited amount of product variants, meanwhile securing a correct production base. RCS Product Configurator generates bills of materials..

Features and properties

With RCS Product Configurator, you give you and your co-workers the opportunity to get an overview. When you sell a product, which demands different parts, it can be hard to have an overview of everything. With RCS Product Configurator, you get an overview of both what is needed and its cost. RCS Product Is 100% integrated with SAP Business One, and the bills of materials can be found in SAP Business One. The bill of materials itself is created in WEB Business Manager (WBM), which is a program that was developed by RCS IT itself, who are certified by SAP. WBM is found online and is easy to use.

WBM gives you the potential to put in complex products, which have many opportunities to be individualized. If you were to renovate your roof, the customization could be the different tiles, slope or with/without a chimney.

SOLSIKKEVEJ 9, 6100 HADERSLEV | TLF. 75598900 | SALG@RCS.DK | CVR. 31424291

Bill of materials

When the final configuration is typed into WBM, the finalized bill of materials can be seen. The bill of materials can afterwards be used for production, simplifying the process.

Problem	Solution
Organization – Do you have problems configuring the solution? It can cause delays and full stops, which means you can't use your co-workers as much as possible.	RCS Product Configurator can secure your configuration of a solution and create the bill of materials from it. The bills are made in WBM, which is fully integrated with SAP Business One.
Resource planning – A lot of time is used to make sure all of the parts have been ordered. You regularly order too many or the wrong parts.	RCS Product Configurator automatically generates a bill of materials that can be used, making it easy and fast to know if all of the parts are in stock.
Effective – In many industries, it is important to be quick to give the customer an offer.	When the bill of materials is finished, it can tell you the sum of all parts and afterwards give your customer a deal.

Business advantages

You get:

- Bills of materials
- Effective purchases (shorter process)
- Fewer wrong purchases
- No pauses because of missing units
- All of your data 100% integrated

RCS IT specializes in providing value-added and fully integrated software solutions for small and medium businesses. Solutions that increase the efficiency of your business and gives you a better overview of your business. RCS IT advises personally and offers unique customized solutions as well as standard solutions that meet your business needs.
