RCS WebShop Connector

RCS WebShop Connector 100% integrated with SAP Business One.

RCS WebShop Connector is a solution that can connect your Web Shop with SAP Business One. A Web Shop that is connected to SAP Business One, can automatically import data to and from the Web Shop and generate orders. That means that your customer- and stock information automatically get updated in both systems. This can save you a lot of time. This solution is for companies that already have a Web Shop, who wishes to integrate the Web Shop with SAP Business One.

Properties and functions

With RCS WebShop Connector you can save time and always be sure, your stock is updated in both SAP Business One and on your Web Shop. This give you a better overview and make it easier to order the right items at the right time. This way you can avoid losing sales to competitors, because of longer lead times. RCS WebShop Connector imports all customer information into SAP Business One, which is very useful if you have many different customers. RCS WebShop Connector can automatically send order-confirmations or other information's to customers. In other words, RCS Web-Shop Connector let the Web Shop and SAP Business One be connected and all the data will therefore always be updated. This saves you from entering data manually.

Company problem	Solution
Lost sales – Do you lose sales, because you don't have items in stock? When you don't have things in stock it creates a longer lead time, and customers can choose to buy from a competitor instead.	With RCS WebShop Connector your stock inventory will automatically get updated and it will be easier for you to see what items you need to stock up on.
Efficiency – You spend a lot of time on entering data, such as customer- and stock data.	RCS WebShop Connector will automatically synchronize the data from the Web Shop and SAP Business One. This way you can save time.
Mistakes – Is there often mistakes because someone entered something wrong in the system?	When people is involved, there will always be a certain level of mistakes, this could be wrong entries in amount, type or wrong contact information. This can be avoided by using RCS WebShop Connector.

Business advantages
» Overview over your stock
» Shorter process (no moving data manually from one system to another)
» Less lost sales, because of longer lead times
» All data automatically updated in SAP Business One
» All data 100% Integrated
