

# RCS Booking One

RCS Booking One is the perfect tool for you who wishes a more flexible everyday life, when working with rental units in like for example camping sites and harbours.

## Simple User Interface

RCS Booking One is delivered with a broad selection of tools that are handled in a simple user interface. With these tools at your hand you will always be on the leading edge with any aspect of your company.

## RCS Booking One offers

- » Fast booking of rental units
- » Access Supervision of your areas
- » Simple consumption summary
- » Booking system with integrated financial system
- » The most stable booking system in the market

# Good Reasons

1. Simple tools that optimize the work procedures in the every day life.
2. Windows based user environment makes it user-friendly.
3. Unique adjustments that match the company's need can be added at any time.

# The Newest Technology

The system is based on the newest technology from Microsoft and Sap which ensures you a solution for the future. RCS Booking One is easily adjusted and very flexible. That is why it is easy to integrate with other systems in the company.

## The System is Adjusted to the Needs of Your Company

SAP Business One is the core in the system together with a SQL server. The Windows based user environment reduces the learning process. Different modules can be chosen and adjusted to suit the needs of your company

## Integrated Functions

### Unit review

With the unit review it is easy to keep track on, which units are rented out, available or reserved in a certain period. With this review you can ensure yourself against loss, because it is simple to see, if all units are rented out.

### Reservation Review

With the reservation review you can get the status of all units in your booking area fast. A graphic illustration shows all available and reserved places for a chosen period.

### Access Supervision

Access supervision can be conducted by the use of magnet cards or the new and more robust cards for touch free card readers. That way you can supervise the guests' access to doors, activity rooms etc.

### Calendar Function

The programme is delivered with an extended calendar function, which makes it easy to manage activities. The calendar is updated with Sundays and holidays and divided into week numbers.

### Consumption

With RCS Booking One you don't have to empty your vending machines for tokens. Instead consumption is registered through the guests' own card. That gives you a simple way to calculate the consumption bill of used units as for instance electricity or water.

## Reports

Via the booking system you can write reports concerning all areas of the company. It gives you access to all detailed information which can optimize the company. For instance you can write out reports for booking reviews, arrivals per day and cash reports.

## Statistics

You get access to a tool for statistics which can be used for improvements of your company's marketing. Statistics can also be lead on a monthly basis and help to create synergies between activities. It can give a review of, which units you sell most of, which customer types that have been visiting and how selling more to that type can be optimized.

## Payment System

With RCS Booking One everything can be handled with one card. The guest has its' own card, that can be used as an access card, but if it is necessary, also as a payment card. At buying extra units these will be written to the guests' card. Furthermore the system makes it possible for you to lead an effective stock management with bar codes. It can show article data on for instance kiosk items. It is only your own imagination that sets the limit for how RCS Booking can be adjusted to your needs.

# For example we can mention

## Finance module

RCS Booking can be delivered with a complete integrated finance module that simplifies all the financial activities. Invoicing and returns are just some of the functions which are in the module. That way you can write out diverse financial reports such as a trade analysis report.

## Bank module

The bank module gives problem-free handling of all financial processes such as incoming and outgoing payments, credit card transactions as well as diverse bank procedures such as rate charging on different units.

## Service module

The service module makes you able to optimize the potential in your service department. There can be lead service planning on different buildings and units. At the same time the module makes it possible to trace activities.

## Hour/Case- control

The system can furthermore be extended with facilities to Hour/ Case- control. The Hour/Case-control is build upon a review of the single employee and his assignments. That gives a review of the workforce as well as administrative savings.

## Online requests

The guests can through your home page make an online request. After this the guest will automatically be updated in your system.
