

Finance Plus

With Finance Plus you get extra functions which can mean even more efficiency and overview.

RCS IT presents Finance Plus

The plus packet naturally contains the same functions as Basic, but Finance Plus has important tools to those companies that work with many different currencies. Therefore RCS IT recommends that these companies make use of the Plus package to simplify complicated processes and to ensure that you can type in faster.

In Finance Plus you can

- » See the balance if you have book kept in foreign currency
- » See the balance in foreign currency in the draft
- » See the balance in the vouchers in foreign currency
- » Import statements of accounts from the bank
- » Make transactions which have been book kept to the wrong account go back or move transactions to another account
- » Book keep diversified value added tax

Good Reasons

1. It is an indispensable tool if your company works a lot with foreign currency. For instance it tells you in a general view if the amounts in foreign currency are correct.
2. It makes the work procedures more efficient because you can import transactions or account statements from another system
3. You can book keep differentiated value added tax transactions and in that way reduce the efforts by book keeping
