

# RCS Document Scan

RCS has developed an Order Manager that can be tailored to your needs.

## RCS IT presents RCS Document Scan

With RCS Document Scan in the cloud, you can easily view, verify, and approve information from any location. RCS Document Scan is a web-based solution that interprets information from your orders. An intelligent solution that gets better and better at interpreting your data and automatically passing on data to your ERP system.

### With RCS Document Scan you can:

- » Orders are viewed, verified and approved online.
- » Data is interpreted automatically and sent to ERP system.
- » Handles paper orders and e-mailed PDF orders in the same solution.
- » Automatic validation of total amount and VAT amount
- » Self-learning technology, which gets better and better.
- » The fields can be adjusted to suit your company.
- » Handles single and multi-page in order in one process.

## Good Reasons

1. Automate the process of data entry.
2. Minimize errors
3. Interprets information at the row level - even though the row varies in length or space
