

RCS Delivery

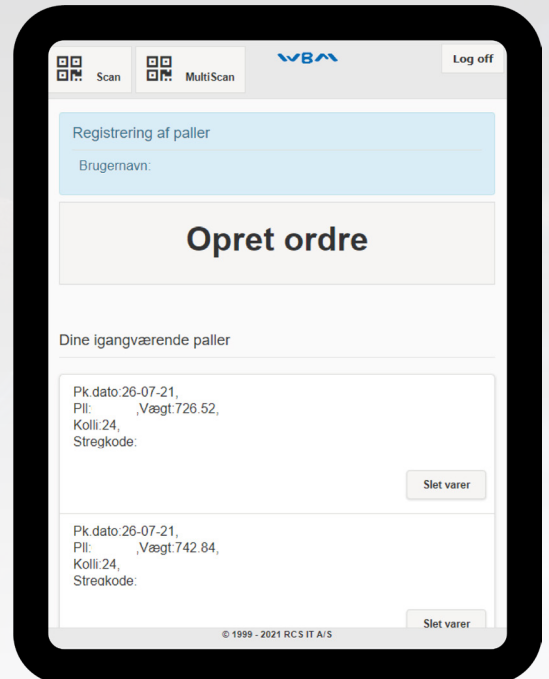

RCS IT has developed an App for Delivery that can be tailored to your needs.

RCS IT presents RCS Delivery

With RCS Item Delivery your employees can quickly scan pallets and have them delivered. The app can be used from all platforms with camera and internet access. The app is simple and easy to use. Employee log in and presses Scan or Multiscan for several pallets. Scan with the camera and then data is sent to the finance system.

With RCS Item Delivery you can:

- » Scan one or more pallets
- » Quick registration of deliveries
- » See the order in your financial system

Good Reasons

1. Your customers can quickly scan pallets for delivery.
2. No more manual entries.
3. You can see the order in your finance system after scanning.
