RCS IT

RCS In/out Stamping

RCS IT has developed an in/out stamping solution that can be tailored to your needs.

RCS IT presents RCS in/out Stamping

With RCS in/out stamping, you and your employees can stamp in and out from all platforms with internet. The system is simple and employees can log in regardless of where they are physically located. The system can tell if an employee is not stamped into normal working hours and employees can then register reasons for absence, such as illness, holiday or other reasons.

In RCS in/out Stamping you can:

» Employees stamp in/out themselves
» Employees select their own reasons for absence

3 Good Reasons

1. Intuitive system
2. Employees stamp in and out themselves
3. Absence is automatically registered by the employee
