

# Account Payable Module

Account Payable Module contains the same functions that are beneficial for companies where several people needs to be able to work in the same document.

## In Account Payable Module you can

- » Search for accounts using - free text search
- » Manually control the attachment number
- » Run in a multi-user environment in the same number series or attachment series
- » Decide whether it should be a purchase order, service invoice, goods receipt, return, incoming prepayment request, incoming advance payment invoice, incoming credit note and incoming preliminary invoice

## Good Reasons

1. You can enter all your papers quickly because you can use one module for everything.
2. The company can work effectively in a multi-user environment.
3. You save time by searching accounts via free text search.
